**CLAIMS 1, 3, 4, 7 AND 8 ARE PRESENTED FOR EXAMINATION**

Applicant's response filed April 27, 2009 has been received and entered into the application.

Applicant's remarks and amendments have overcome the rejections not reiterated herein from the previous Office action. Such rejections not reiterated from the previous office action are hereby withdrawn. The following rejection constitutes the totality of issues remaining in the present application.

The Merck reference cited on the attached form PTO-892 is newly cited by the Examiner; not necessitated by Applicant's amendment. Thus, the present Office action will not be made final.

***Legal Standard for Anticipation/Inherency Under - 35 USC § 102***

To anticipate a claim under 35 U.S.C. § 102, a single prior art reference must place the invention in the public's possession by disclosing each and every element of the claimed invention in a manner sufficient to enable one skilled in the art to practice the invention. *Scripps Clinic & Research Foundation v. Genetech, Inc.*, 927 F.2d 1565, 1576, 18 U.S.P.Q.2d 1001, 1001 (Fed. Cir. 1991); *In re Donahue*, 766 F.2d 531, 533, 226 U.S.P.Q. 619, 621 (Fed. Cir. 1985). To anticipate, the prior art must either expressly or inherently disclose every limitation of the claimed invention. *MEHL/Biophile Int'l Corp. v. Milgraum*, 192 F.3d 1362, 1365, 52 U.S.P.Q.2d 1303, 1303 (Fed. Cir. 1999) (citing to *In re Schreiber*, 128 F.3d 1473, 1477, 44 U.S.P.Q. 1429, 1431 (Fed. Cir. 1997)); *Atlas Powder Co. v. Ireco Inc.*, 190 F.3d 1342, 1347, 51 U.S.P.Q.2d 1943, 1946 (Fed. Cir. 1999). To inherently anticipate, the prior art must necessarily function in accordance

Art Unit: 1614

with, or include, the claimed limitations. *MEHL/Biophile*, 192 F.3d at 1365, 52 U.S.P.Q.2d at 1303. However, it is not required that those of ordinary skill in the art recognize the inherent characteristics or the function of the prior art. *Id.* Specifically, discovery of the mechanism underlying a known process does not make it patentable. See also MPEP §§ 2112, 2112.02 and 2145(II).

***Claim Rejection - 35 USC § 102(b)***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Merck, (newly cited by the Examiner, page 409; citation 2612 “Cryptoxanthin”).

In light of the fact that the Examiner now relies on a different reference, Applicant’s arguments against the same are thus rendered moot. No further comment regarding such arguments is deemed necessary.

Merck teaches a composition comprising  $\beta$ -cryptoxanthin which is not taught to contain any contaminants (page 409, citation 2612, esp. lines 1-2; cited by the Examiner).

While Merck fails to teach that the composition is useful for the presently claimed bone diseases, (present claims 4, 7 and/or 8), or that the  $\beta$ -cryptoxanthin composition was extracted from Satsuma orange, (present claim 2) such does not impart any patentable significance because the intended use does not impart any physical or otherwise material physical element that is not present in the present claims.

Art Unit: 1614

Accordingly, the Merck reference meets each patentable element recited in present claims 1, 3, 4, 7 and 8.

None of the claims are currently in condition for allowance.
